

## Local Area Personal Income, 1999–2001

By Jeffrey L. Newman

THE Bureau of Economic Analysis (BEA) has released new estimates for 2001 and revised estimates for 1999–2000 of personal income for counties, metropolitan areas, and BEA economic areas (see the box “Definitions of Local Areas”). These estimates incorporate the results of the annual revision of state personal income from September 2002 and newly available county-level source data that are more complete and otherwise more appropriate than those that were previously available.<sup>1</sup> In addition, these local area estimates are consistent with the state personal income estimates that are published in this issue.<sup>2</sup>

The new estimates of personal income for 2001 demonstrate the weakness of economies nationwide. For the Nation, personal income grew 3.3 percent in 2001, down from 8.0 percent in 2000. The weakness in personal income was partly accounted for by a slowdown in manufacturing.

In 2001, the gap between the personal income growth rate for urban areas and that for rural areas was the smallest since 1996, the last year that rural areas grew faster than urban areas. Metropolitan area personal income grew 3.4 percent in 2001, down from 8.3

1. See Jeffrey L. Newman, “State Personal Income, Revised Estimates for 1999–2001,” *SURVEY OF CURRENT BUSINESS* 82 (October 2002): 125–147.

2. See G. Andrew Bernat, Jr., “State Personal Income and Per Capita Personal Income, 2002,” *SURVEY* 83 (May 2003): 16–41.

percent in 2000, and nonmetropolitan area personal income grew 2.9 percent, down from 5.9 percent (chart 1). The narrowing of the gap in 2001 was attributable to sharper slowdowns in net earnings and in dividends, interest, and rent in urban areas than in rural areas.

Although personal income growth decelerated significantly in urban and rural areas in both 1991 and 2001, urban areas grew faster in 2001 while rural areas grew faster in 1991. In both years, net earnings slowed in both urban and rural areas, but in 1991, dividends, interest, and rent picked up in rural areas.

As part of this annual revision of the local area estimates, a change in industry classification for the earnings and employment estimates is introduced. The estimates for 2001 are based on new industry classifications derived from the 2002 version of the North American Industry Classification System (see the box “New Industry Classifications” on page 46).

According to the estimates for metropolitan areas for 2001:

- Personal income for the Nation increased 3.3 percent in 2001 after increasing 8.0 percent in 2000.
- Personal income growth among metropolitan area quintiles ranged from 5.5 percent in the highest quintile to 0.3 percent in lowest quintile. Of the Nation’s 318 metropolitan areas, 174 had personal

### Definitions of Local Areas

Local areas are metropolitan areas, BEA economic areas, and counties. The estimates for metropolitan areas and BEA economic areas are derived from the county estimates.

The metropolitan areas (see table 1 at the end of the article) in all states are those defined in terms of counties and county equivalents by the Office of Management and Budget (OMB) for Federal statistical purposes.<sup>1</sup>

Each BEA economic area (see table 2) consists of one or more economic nodes—usually metropolitan areas—and the surrounding counties that are economically related to the node.<sup>2</sup>

The counties (see table 3) include county equivalents.

For Virginia, the estimates are also presented for the larger independent cities; the estimates for the smaller independent cities are combined with the estimates for adjacent counties.

1. For the New England region, OMB’s preferred definitions of the metropolitan areas are in terms of cities and towns, but the available data for cities and towns are not sufficient to prepare estimates of personal income. BEA uses the OMB-defined New England Consolidated Metropolitan Areas, which are based on county definitions, for its New England metropolitan areas.

The list of the metropolitan areas and their constituent counties and county equivalents is available on BEA’s Web site at <[www.bea.gov/bea/regional/docs/msalist.htm](http://www.bea.gov/bea/regional/docs/msalist.htm)>.

2. See Kenneth P. Johnson, “Redefinition of the BEA Economic Areas,” *SURVEY* 75 (February 1995): 75–81, or <[www.bea.gov/bea/regional/articles/029rea/maintext.htm](http://www.bea.gov/bea/regional/articles/029rea/maintext.htm)>.

income growth that equaled or bettered the national average.

- San Jose, CA, had the biggest decline in personal income, at -6.9 percent, after having the fastest growth in 2000.
- Despite a decline in 2001, San Francisco, CA, at \$57,714, continued to have the highest per capita personal income. Per capita personal income in McAllen-Edinburg-Mission, TX, was the lowest, at \$13,788.
- According to the estimates for counties for 2001:
- Loudoun County, VA, at 12.5 percent, had the fastest growth in personal income among counties with populations of at least 50,000. Santa Clara County (San Jose), CA, at -6.9 percent, had the biggest decline.
- Per capita personal income in New York County (Manhattan), NY, was the highest, at \$92,984, or 306 percent of the national average. Per capita personal income in Loup County, NE was the lowest, at \$6,235, or 21 percent of the national average.

This article presents the preliminary estimates of local area personal income and per capita personal income for 2001, and it describes the sources of the revisions to the estimates for 1999–2000 and the effects of the revisions on the estimates for metropolitan areas. The estimates for 1999–2001 are presented in tables 1–3 at the end of this article. For the availability of additional estimates, see the box “Data Availability.”

## Personal income for metropolitan areas for 2001

The slowdown in the personal income growth rate for the Nation to 3.3 percent in 2001 reflected slow growth

in net earnings and in dividends, interest, and rent (table A). These slowdowns occurred in both urban and rural areas. Net earnings growth decelerated over 5.5 percentage points in metropolitan areas and almost 4 percentage points in nonmetropolitan areas, and growth in dividends, interest, and rent decelerated over 8 percentage points in metropolitan areas and over 7 percentage points in nonmetropolitan areas. Personal income growth was affected by slowdowns in both traditional and high-tech manufacturing and in services and by the decline of the stock market from its peak in March 2000.<sup>3</sup>

**Fastest and slowest growing areas.** In 2001, growth in personal income among metropolitan area quintiles ranged from 5.5 percent in the highest quintile to 0.3 percent in the lowest quintile. Houston, TX (6.6 percent), Washington, DC-MD-VA-WV (5.3 percent), and Los Angeles-Long Beach, CA (4.8 percent) were among the large metropolitan areas in the highest quintile.

San Jose, CA (-6.9 percent), San Francisco, CA (-1.7 percent), Dallas, TX (1.2 percent), Detroit, MI (1.4 percent), and Seattle-Bellevue-Everett, WA (1.8 percent) were among the large metropolitan areas in the lowest quintile. San Jose, San Francisco, Dallas, and Seattle-Bellevue-Everett were affected by slowdowns in the high-tech industries, and Detroit was affected by slowdowns in traditional manufacturing industries. San Jose had the slowest growth in personal income after having the fastest growth in 2000.

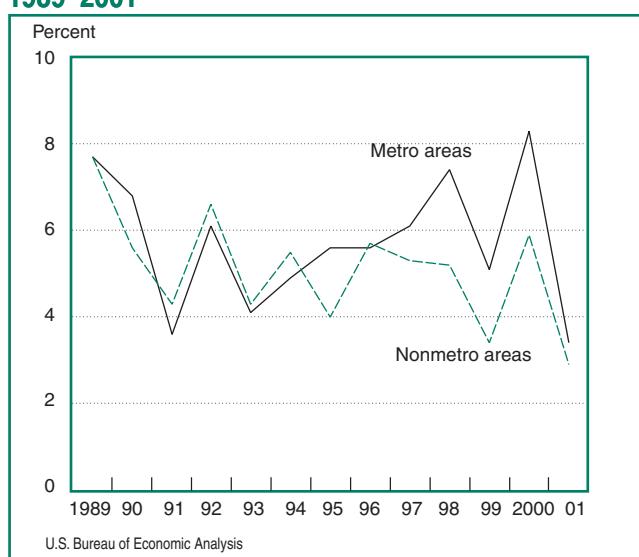

3. “High-tech manufacturing” includes industries that manufacture computers, computer peripherals, communications equipment, and similar electronic products.

1. Percent changes are calculated using unrounded data.

**Chart 1. Annual Growth in Personal Income, 1989–2001**

**Highest and lowest levels of per capita income.** In 2001, 6 of the 10 metropolitan areas with highest per capita personal income in the Nation were in the greater New York area (table B). Despite declines in 2001, San Francisco, CA, at \$57,714, and San Jose, CA, at \$51,579, continued to have the highest per capita income.

In the 10 metropolitan areas with the lowest per capita personal income, the 6 areas that border with Mexico—Brownsville-Harlingen-San Benito, TX, El Paso, TX, Laredo, TX, Las Cruces, NM, McAllen-Edinburg-Mission, TX, and Yuma, AZ—all had per capita income growth that exceeded the national average of

2.2 percent. Nevertheless, McAllen-Edinburg-Mission, at \$13,788, continued to have the lowest per capita personal income.

### Personal income for counties for 2001

In 2001, the growth rates of personal income in the 10 fastest growing counties were at least 6.3 percentage points above the national average (table C). In 8 of the 10 fastest growing counties, population grew at least 3 percent. In Loudoun, VA—which had the fastest personal income growth, at 12.5 percent—and in Douglas, CO, population grew more than 9 percent. Lea County, NM—which had declines in population in both 2000 and 2001—had large growth in mining-related industries.

In the 10 slowest growing counties in 2001, personal income growth declined at least 2.2 percentage points. In Santa Clara, CA, San Mateo, CA, Santa Cruz, CA, and San Benito, CA, earnings declined in high-tech industries. In Steuben, NY, Tuscola, MI, Howard, IN, and St. Joseph, MI, durable goods manufacturing declined. Only San Benito, CA, had population growth, at 2.5 percent, that exceeded the national average.

**Highest and lowest levels of per capita income for all counties.** In 2001, 7 of the 10 counties with the highest per capita personal income were in the greater New York and San Francisco areas (table D). New York County (Manhattan), NY, at \$92,984, had the highest per capita income. All 10 of these counties had per capita personal incomes that were at least 84 percent higher than the national average of \$30,413.

Of the 10 counties with the lowest per capita personal income, 6 are in Nebraska. Loup County, NE, at \$6,235, had the lowest per capita income. All 10 of

### Alternative Measures of County Employment and Wages

Three widely used measures of annual county employment and wages by place of work are the Census Bureau's employment and payroll data in the *County Business Patterns* (CBP) series, the Bureau of Labor Statistics' (BLS) employment and wage tabulations from the unemployment insurance (UI) program, and BEA's estimates of total wage and salary disbursements and employment.

The *CBP* data on employment and payrolls are an annual extension of the Census Bureau's quinquennial economic censuses; the data are derived from Federal administrative records and survey information of business establishments. The BLS data on county employment and wages are the product of the Federal-State Covered Employment and Wages, or ES-202, Program; the data are derived from tabulations of monthly employment and quarterly total wages of workers covered by state UI legislation and of Federal workers covered by the unemployment compensation for Federal employees (UCFE) program. BEA's estimates of total employment and total wage and salary disbursements are derived from the BLS data, which account for 95 percent of the wage and salary component of BEA's personal income estimates.

The coverage of the *CBP* data primarily differs from that of the BLS data because the *CBP* data exclude most government employees, and the BLS data cover civilian government employees (exhibit A).<sup>1</sup> The BLS data also include some agricultural production employees and household employees that are excluded by the *CBP* data. However, the *CBP* coverage of the employees of educational and membership organizations and of small non-profit organizations in other industries is more complete than the coverage of these employees in the BLS data. Beginning in 2001, employees of the American Indian Tribal Councils are included in the local government component by BLS and BEA. Prior to 2001, these employees were included in the relevant private industry components.<sup>2</sup> The *CBP* data continue to classify these employees in the relevant private industry components. Finally, *CBP* reports employment for the month of March, whereas the BLS employment data are an annual average of monthly data.

The BEA estimates of employment and wages differ from the BLS data because BEA makes adjustments to account for employment and wages not covered, or not fully covered, by the state UI and the UCFE programs. First, BEA adds estimates of employment and wages to

the BLS data to bridge small gaps in UI coverage: For nonprofit organizations not participating in the UI program (several industries), for students and their spouses employed by public colleges or universities, for elected officials and members of the judiciary (state and local government), for interns employed by hospitals and by social service agencies, and for insurance agents classified as statutory employees (insurance agencies). Second, BEA uses additional source data to estimate most or all of the employment and wages for the following: Farms, farm labor contractors, private households, private elementary and secondary schools, religious membership organizations, railroads, military, and U.S. residents who are employed by international organizations and by foreign embassies and consulates in the United States. Third, BEA adjusts employment and wages for misreporting under the UI and UCFE programs.<sup>3</sup>

The Census Bureau released 2001 data on county total employment and payrolls on its Web site on April 10, 2003.<sup>4</sup> BLS released 2001 annual county data on total employment and average annual pay on its Web site on November 21, 2002.<sup>5</sup> BEA's released the 2001 estimates and the revised 1999–2000 estimates of total wage employment and total wage and salary disbursements on its Web site on December 30, 2002.<sup>6</sup>

Equals: Wage and salary disbursements, BEA .....	8	4,468.3	4,834.3	4,947.4

1. Beginning in 2001, BLS civilian government wages have been adjusted to remove American Indian Tribal Council (AITC) wages because these data are already included in the Census Bureau's total payroll data. Prior to 2001, BLS classified AITC establishment data in the relevant private industry components rather than in local government.

2. Includes differences of coverage in private education, membership organizations, and government.

3. Consists of the difference between estimates from more comprehensive source data and

BLS wages and salaries for agriculture, forestry, and fishing; railroad transportation; health services; educational services; social services; membership organizations; private households; and the Federal Government.

4. Consists of wages and salaries for the insurance agents, for the students and their spouses employed by public colleges or universities, for the nonprofit organizations not participating in the unemployment insurance program, and of other adjustments.

BEA Bureau of Economic Analysis

BLS Bureau of Labor Statistics

1. The *CBP* coverage of government employees is limited to those working in government hospitals, depository institutions, Federal and federally sponsored credit agencies, liquor stores, and wholesale liquor establishments.

2. For example, employees of casinos owned by tribal councils before 2001 were included in the Standard Industrial Classification services component "Amusement and Recreational Services."

these counties had per capita personal income that were at least 63 percent lower than the national average.

### Source Data and Revisions

This section identifies the principal source data used to revise the estimates for 1999–2000 and to prepare the estimates for 2001.<sup>4</sup> It also discusses the metropolitan areas that had the largest revisions to personal income for 2000.

**Revised estimates for 1999–2000.** For wage and salary disbursements, the estimates were revised to incorporate revised Bureau of Labor Statistics (BLS) tabulations of wages and salaries paid by employers; the tabulations are based on reports from the state unemployment insurance system. For other labor income and for personal contributions for social insurance, revised estimates are mainly based on the revised estimates of wages and salaries.

For nonfarm proprietors' income, the estimates were revised to incorporate tax data for sole proprietorships and partnerships for 1999 from the Internal Revenue Service (IRS) and to incorporate updated

4. For a detailed description of the sources and methods used to prepare the estimates, go to BEA's Web site at <[www.bea.gov/bea/regional/articles/lapi2000/](http://www.bea.gov/bea/regional/articles/lapi2000/)>.

data on net margins of rural electric and telephone cooperatives from the U.S. Department of Agriculture (USDA).

The 2000 estimates of dividends, interest, and rent and of the adjustment for residence, which is an estimate of the net inflow of the earnings of interarea

### New Industry Classifications

The estimates of county and metropolitan personal income for 2001 are now based on the 2002 version of the North American Industry Classification System (NAICS), the common classification system for the United States, Canada, and Mexico that was adopted in 1997 and updated in 2002.<sup>1</sup> NAICS replaced the 1987 Standard Industrial Classification (SIC) system, which was the basis of the previously published estimates of local area personal income.<sup>2</sup>

BEA received county-level estimates of employment and wages—which are the product of the Federal-State Covered Employment and Wages (or ES–202) Program—for 2001 from the Bureau of Labor Statistics (BLS) on a 2002 NAICS basis. Some of the NAICS classifications had to be adapted for use in BEA's estimates of earnings and employment because BEA provides estimates for the Federal, state, and local governments. For example, the estimates of employment and earnings for

teachers employed by local governments are shown under the category “Local Government” instead of under the NAICS category “Educational Services.” BEA uses ownership codes provided by BLS to identify the government employees. For private-sector employees, BEA prepared earnings estimates at the three-digit NAICS level for 2001 and at the two-digit SIC level for 1969–2000. For employment, BEA prepared estimates at the NAICS sector level for 2001 and at the SIC division level for 1969–2000.

In September 2002, BEA released state estimates of earnings and employment at the three-digit NAICS level for 2001 and at the two-digit SIC level for 1958–2000.<sup>3</sup> For 2001 only, BEA also prepared state-level earnings and employment estimates with division-level SIC components in order to provide a “bridge” between the NAICS industries and the SIC industries.

In July 2003, BEA will release quarterly state estimates of earnings at the NAICS-sector level beginning with the first quarter of 2001. Estimates for earlier quarters will remain on the SIC basis.

1. See John R. Kort, “The North American Classification System in BEA's Economic Accounts,” SURVEY OF CURRENT BUSINESS 81 (May 2001): 7–13. See also Office of Management and Budget, *North American Industry Classification System: United States, 2002* (Lanham, MD: Bernan Press, 2002). Information on NAICS can be accessed at <[www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html)>.

2. See Office of Management and Budget, *Standard Industrial Classification Manual, 1987*, (Washington, DC: U.S. Government Printing Office, 1987).

3. Detailed estimates of personal income and employment for states are available on BEA's Web site at <[www.bea.gov/bea/regional/sp1/](http://www.bea.gov/bea/regional/sp1/)>.

commuters, were revised to incorporate IRS tabulations of individual income tax return data for 2000.

The 2000 estimates of per capita personal income were revised to incorporate revised Census Bureau population estimates for 2000.

**New estimates for 2001.** The estimates of wage and salary disbursements are mainly based on BLS tabulations of employers' payrolls for 2001. The estimates of other labor income and of personal contributions for social insurance are mainly based on the estimates of wages and salaries.

For farm proprietors' income, the estimates of government subsidy payments for all states and of gross receipts for most of the major farm states are based on 2001 data from USDA and from state agricultural

statistical agencies. The estimates of the production expenses are mainly based on data from the 1997 Census of Agriculture.

For transfer payments, the estimates of social security benefits are based on 2001 data from the Social Security Administration, and the estimates of veterans benefits are based on 2001 data from the Department of Veterans Affairs. The estimates of Medicare payments are based on 2001 data from the Centers for Medicare and Medicaid Services. For most states, the estimates of unemployment compensation and of transfer payments under most of the major means-tested programs—including Medicaid, family assistance, supplemental security income, and food stamps—are based on 2001 data from the state

NFPI Nonfarm proprietors' income

### Acknowledgments

The revised estimates of local area personal income were prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. John W. Ruser, Associate Director for Regional Economics, provided general guidance. The preparation of the revised estimates was a divisionwide effort.

The estimates of nonfarm wages and salaries and other labor income were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, Michael G. Pilot, Mauricio Ortiz, John A. Rusinko, and James M. Scott. Contributing staff members were Michael L. Berry, Kristin M. Chambliss, Susan P. Den Herder, Lisa B. Emerson, John D. Laffman, Russell C. Lusher, Richard A. Lutyk, Paul K. Medzerian, Michael Phillips, Curtis Roberson, Victor A. Sahadachny, Elizabeth F. Stell, Brent J. Thompson, and Jaime Zenzano.

The annual estimates of farm wages and salaries, other labor income, proprietors' income, property income,

transfer payments, personal contributions for social insurance, and the adjustment for residence were prepared by the Regional Income Branch under the supervision of James M. Zavrel, Chief. Major responsibilities were assigned to Charles A. Jolley, Jeffrey L. Newman, and James P. Stehle. Contributing staff members were Suet M. Boudhraa, Elaine M. Briccetti, Carrie L. Case, Daniel R. Corrin, Keren Israeli, Toan A. Ly, W. Tim McKeel, and Marianne A. Ziver.

The public use tabulations and data files were assembled and the tables were prepared by the Regional Economic Information System Branch under the supervision of Kathy A. Albetski, Chief. Major responsibilities were assigned to Gary V. Kennedy. Contributing staff members were H Steven Dolan, Michael J. Paris, Alison M. Skinner, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

Adrienne T. Pilot contributed to the preparation of this article.

government agencies that administer the programs.

For nonfarm proprietors' income, for dividends, interest, and rent, and for residence adjustment, the 2001 estimates are mainly extrapolated from the data that were used to prepare the 2000 estimates.

**Rewvisions to personal income for 2000.** For 2000, personal income for the Nation was revised up \$84.8 billion, or 1.0 percent, to \$8,398.9 billion (table E). The revisions to the estimates for metropolitan areas ranged between 5.8 percent for Fort Myers-Cape Coral, FL, and -3.0 percent for Barnstable-Yarmouth, MA. For Fort Myers-Cape Coral, the revision largely reflected an upward revision to dividends, interest, and rent that reflected the incorporation of individual in-

come tax return data for 1999. For Barnstable-Yarmouth, the revision reflected a downward revision to the residence adjustment that reflected the incorporation of 2000 IRS wage data. Personal income was revised up for 263 areas, was revised down for 45 areas, and was unrevised for 10 areas. For 228 of the 318 metropolitan areas, the revisions to personal income were within 1 percentage point of the national revision.

Together, the five areas with the largest upward revisions and the five areas with the largest downward revisions accounted for 1.0 percent of the Nation's personal income in 2000.

*Tables 1-3 follow.*

### Data Availability

This article presents summary estimates of personal income and per capita personal income for 1999–2001. More detailed estimates for 1969–2001 are also available. The estimates of personal income and employment for local areas are now available interactively on BEA's Web site; go to <[www.bea.gov/bea/regional/reis](http://www.bea.gov/bea/regional/reis)>.

The following estimates are available:

- Personal income, per capita personal income, and population for 1969–2001
- Personal income by major source and earnings by industry (North American Industry Classification System (NAICS) three digit) for 2001 and (Standard Industrial Classification (SIC) two digit) for 1969–2000
- Full-time and part-time employment by industry (NAICS sector level) for 2001 and (SIC division level) for 1969–2000
- Regional economic profiles (featuring a selection of personal income and employment data) for 1969–2001
- Transfer payments (by major program) for 1969–2001
- Farm income and expenses (including the major categories of gross receipts and expenses for all farms and for measures of farm income) for 1969–2001
- Counties with the highest and lowest per capita

personal incomes in 2001

- Personal income and per capita personal income, including 2001 rankings by per capita personal income, for 1999–2001
- Total wage and salary disbursements, total wage employment, and average wages per job for counties and metropolitan areas for 1969–2001

In addition, the entire set of estimates for all areas will be available in June 2003 on a CD-ROM that also includes the quarterly state estimates of personal income for 1948–2002 and an updated description of the sources and methods used to estimate local area personal income. To order the CD-ROM *Regional Economic Information System, 1969–2001* (product number RCN-0316), call the Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

The local area personal income estimates are also available through the members of the BEA User Group, which consists of state agencies and universities that help BEA to disseminate the estimates in their states. For a list of the BEA User Group on BEA's Web site, go to <[www.bea.gov/bea/regional/docs/usergrp.htm](http://www.bea.gov/bea/regional/docs/usergrp.htm)>.

For more information, call the Regional Economic Information System at 202-606-5360, fax 202-606-5322, or e-mail [reis.remd@bea.gov](mailto:reis.remd@bea.gov).
